Research Interests

Mobile devices and apps produce a great deal of personal data. Such personal data precisely describes each end-user's behavior, interests, and surrounding environment. There are two related challenges for developers w.r.t. personal data:

1. How can we make use of such data to provide better personalized services?
2. How can we guarantee security and privacy of users' personal data?

My research aim to address these challenges through software analysis and machine learning techniques.

Education

Ph.D., Computer Science, Peking University	2014.09 – Now
<ul style="list-style-type: none">• Advisors: Yao Guo, Xiangqun Chen, Gang Huang	
Visiting Student, HCII, Carnegie Mellon University	2016.09 – 2017.09
<ul style="list-style-type: none">• Advisors: Jason I. Hong, Yuvraj Agarwal	
B.S., Computer Science, Peking University	2010.09 – 2014.09

Professional Experiences

Research Intern, Microsoft Research, Redmond, USA	2018.05 – 2018.08
<ul style="list-style-type: none">• Advisors: Oriana Riva• Worked on converting traditional software into conversational bots	
Software Intern, Xiaomi Monetization Department, Beijing, China	2017.10 – 2018.05
<ul style="list-style-type: none">• Advisors: Chengming Wen• Worked on building personal knowledge graphs for privacy-friendly user modeling
